Feeding Solutions Guide

# THE ULTIMATE COMBINATION FOR A BALANCED DIET

## GRO 'N WIN® & GRO 'N WIN® ALFA

- Low starch and sugar
- Low calorie feed
- Supplies essential nutrients, including high-quality protein, vitamins & minerals
- Allows for a lower feeding rate
- Balanced calcium to phosphorus ratio
- Balanced amino acids and lower protein level for legume forage (GRO 'N WIN® ALFA)

## ULTIMATE FINISH® 25

- 25% fat supplement used to increase calories without adding more grain
- Blend of vegetable oils from flaxseed, soybeans and rice bran
- Fortified with minerals and vitamins so no dilution of the diet occurs
- High in omega-3 and -6 fatty acids
- Equine-dedicated extruded technology means the highest digestibility for your horse
- Low starch and sugar formula, suitable for horses with metabolic issues
- Use for hard keepers and horses that need to gain weight or for enhanced skin and coat condition

### Why They are Great Together

Easy to use and cost effective, these two products along with a good quality hay or pasture can be the only essentials your horse needs for a total balanced diet.

A horse's digestive system is made to hold small quantities of food. Large grain meals can lead to changes in the microbial population in the hindgut, increasing the incidence for digestive disturbances, including colic, diarrhea, and laminitis. GRO 'N WIN® and ULTIMATE FINISH® 25 are designed to be fed at lower amounts per day, allowing a more natural way for your horse to eat.

ULTIMATE FINISH® 25 increases the calories in your horse's diet in a smaller, more concentrated volume. Vegetable fats such as flaxseed and rice bran found in ULTIMATE FINISH® 25 contain a high percentage of unsaturated fatty acids such as omega-3 fatty acids. These are important for improving immune function, reducing inflammation, healthy skin, and coat condition.

### Our Brand Promise

At BUCKEYE® Nutrition, we believe horses enrich people's lives. Our team of dedicated associates are a reliable source for nutritional advice or guidance for your horse. Our equine nutritionists provide scientifically-based equine nutritional solutions with the support of WALTHAM®, a world-leading authority on petcare. Our BUCKEYE® Nutrition brand promise is to provide the highest quality, safest feed available.

## Feeding Solutions Guide

### Mature Horses

Forage serves as the basis of a mature horse's diet, but not all forages are balanced to meet their daily nutrient requirements.

**Example:** 10-year old Quarter Horse

**Activity:** Occasional Trail Rides

**Daily Feeding Rate:**

✓ 18 lbs grass hay ✓ 1 ½ lbs GRO 'N WIN® ✓ ½ lb ULTIMATE FINISH® 25

### Broodmares

Ensures adequate levels of amino acids, vitamins & minerals to balance forage, and adds a highly digestible & palatable calorie source to maintain body condition during gestation & lactation.

**Example:** Thoroughbred Mare

**Stage:** Late Lactation

**Daily Feeding Rate:**

✓ 20 lbs grass/alfalfa mixed hay ✓ 3 ½ lbs GRO 'N WIN® ✓ 2 lbs ULTIMATE FINISH® 25

### Growing Horses

Supports young horses' growth rate with high quality essential amino acids, including guaranteed levels of lysine, methionine and threonine.

**Example:** 4-month old Hanoverian Weanling

**Stage:** Growing

**Daily Feeding Rate:**

✓ 4 lbs grass/alfalfa mixed hay ✓ 3 lbs GRO 'N WIN® ✓ ¼ lb ULTIMATE FINISH® 25

### Performance Horses

Exercise increases the need for key nutrients in time of work and recovery. Supports muscle condition and repair while elevated levels of antioxidants supports immune function and recovery.

**Example:** Thoroughbred/Connemara Cross

**Activity:** Lower Level Eventing

**Daily Feeding Rate:**

✓ 20 lbs mixed grass hay ✓ 2 lbs GRO 'N WIN® ✓ 1 lb ULTIMATE FINISH®

### Senior Horses

The pelleted and extruded forms allow senior horses, even those with dental issues, to properly digest the nutrients they need to support overall health and metabolism.

**Example:** 29-year old Morgan

**Activity:** Idle/Retired

**Daily Feeding Rate:**

✓ 14 lbs mixed grass hay ✓ 1 lb GRO 'N WIN® ✓ ½ lb ULTIMATE FINISH® 25

### Targeted Nutrition

The perfect solution to horses with very specific conditions; obesity, insulin resistance, metabolic syndrome, laminitis and tying-up.

**Example:** 16-year old Halfinger

**Condition:** Obesity

**Daily Feeding Rate:**

✓ 15 lbs mixed grass hay ✓ 1 ¼ lbs GRO 'N WIN® ✓ ¼ lb ULTIMATE FINISH® 25
