

WALTHAM®- BUCKEYE® Equine Grant Application

Overview

- The WALTHAM® Foundation is a non-charitable organization which funds research into nutrition, health, behaviour and welfare of companion animals around the world.
- The WALTHAM® Foundation will only sponsor RESEARCH projects. It will not provide funding, for example, for student travel or college scholarships or charitable activities that do not involve research.
- It is expected that recipients of a WALTHAM® Foundation award will work at a university or research institute that provides basic research facilities, and will publish their research in scientific journals so that companion animals around the world benefit from the research.
- These are competitive grants; applications will be considered based upon their scientific merit and compliance with ethical standards. Unfortunately we receive far more applications each year than we can fund, so please do not be discouraged should your proposal not be selected in any given year.
- Feedback with respect to the granting or otherwise of an award will not be provided.

The foundation will NOT sponsor the following;

- Research into surgical procedures, pharmacological studies, toxicological studies or those studies that are likely to lead to the development of a drug or vaccine.
- Research that causes suffering or results in euthanasia of the animals involved, or studies whose subjects have clinical conditions which have been artificially induced.
- Any non-research proposals including students' scholarships for travel or academic courses; donations to charitable organizations or for charitable work.

WALTHAM®-BUCKEYE® EQUINE GRANTS

- All projects submitted to the WALTHAM® Foundation involving equidae will be considered under the WALTHAM®-BUCKEYE® Equine Grant process.
- A maximum of \$20,000 will be awarded each year (and could be awarded to one project or split between 2 or more projects).
- Applications for sums greater than \$20,000 will not be considered.
- Special one-off WALTHAM®-BUCKEYE® research awards may be offered under the same terms as the main award.
- Applications from any country will be considered but, in the 2016 process, applications from the US [with a nutrition focus](#) will be given first priority.
- A condition of being awarded any WALTHAM®-BUCKEYE® grant is that either Amber D. Moffett-Krotky (BUCKEYE), or Dr. Pat Harris (WALTHAM) will become external advisors to the project (as is appropriate according to the topic/area of investigation). The level of their involvement and contact arrangements are to be agreed upon prior to the commencement of the project
- Projects to commence 1 July 2016. Research should be completed by 1 July 2017. Exceptions to these timings can be made with written agreement of the assigned external advisors
- The project may be part of an existing program, but the application should be for a clearly defined piece of original research.
- Successful applicants will be required to provide written project reports every 6 months during the study and within 3 months of completing the research.
- Copies of any publications arising from this work are to be submitted at least 30 days prior to submission. Where the external advisors have provided appropriate intellectual input, they will have the option to be co-authors on any publication.

WALTHAM®- BUCKEYE® Equine Grant Application

Language

- The application form should be submitted in English, as the reviewing panel will be conducted in English. However, applications in Thai, Chinese, Japanese, Russian, Spanish or Portuguese may be submitted three months prior to the English deadline for translation.

Closing date - Signed and dated applications must be received at the BUCKEYE® Nutrition by **31 March 2016**

- Receipt of applications will be acknowledged by e-mail
- Applicants will be notified of the outcome of their proposal in May 2016

Applications can be sent;

- a) Electronically to R&D.HorsecareUS@effem.com,
- b) By fax to 800-322-0081 to Buckeye Nutrition, Attention: Amber Moffett-Krotky

Timeline

- **March 31st** – All Applications DUE
- April – Initial Review of Applications
- Mid-April – Final Review of Applications
- May – Grant Awarded

Guidelines for completing the application form

- Application forms should ideally be type written using an easily readable font (a minimum of Times New Roman 11 Pitch or Arial 10 pitch).
- If you reproduce the application form in your own word-processing package, the same wording and layout as used in this form must be used.
- The application form must not exceed four sides of A4.

1. Title of study

Please make this as brief as possible and no more than 2 lines of legible text.

2. Title, first name, surname & job title of principal author

Please fill in title, first name, surname (family name) and job title in this order, of the person to whom all correspondence should be addressed

E.g. Dr. Anne Other

3. Title, first name, surname & job title of all other applicants

Information should be given in the stated order.

4. Contact details

This is the address (including country and postal/zip code), telephone number (please include country code), fax number and e-mail address of the principal applicant.

5. Address(es) at which study will be conducted if different from above

- If the proposed study is field based, please identify the address from which this will be based
- If the study is likely to be conducted at more than one research centre, please identify each centre.

6. Summary of relevant experience of principal applicant

This should include key positions held and relevant research experience.

7. Relevant publications by principal applicant or research group

Include full details (maximum 3)

WALTHAM®- BUCKEYE® Equine Grant Application

8. Duration of study

- Please note that projects must be completed by 1 July 2016 (unless otherwise agreed in advance in writing with the assigned external advisor).

9-10. Budget Breakdown

- Provide a **complete and detailed** breakdown of the budget (the total should add up to that given in section 9) e.g. animals, husbandry care, animal diets, consumables, etc.
- Funding will not be provided for travel and accommodation unless it is for essential fieldwork. It will not support travel and subsistence or registration for scientific meetings / conference / workshops. Nor will funding be provided for the purchase of equipment or computers.
- Overheads / University indirect costs combined must not exceed 20% of the total sum requested, even though the Waltham Foundation is NOT a charitable organization.
- Please identify and give a breakdown of other sources of funding required to complete this study.

11. Project proposal (max 3 sides of A4 paper)

All studies should include the following. Please note that the term horse is taken to represent equidae in general.

- Brief background to the study;
- Aims and hypothesis;
- Experimental design including materials and methods.
- Valid statistical model clearly defining terms and effects.
- Clearly defined experimental design (e.g. 4x4 Latin Square)
- A summary of the key outcomes, possible applications and benefit of this study for horses
- Source of the horses (e.g. whether they are client-owned, a university resource, shelter animals etc)
- Housing and husbandry conditions (including diet and supplements being fed)
- Fate of the horses at the end of the study (we will not support any study that results in the death of an animal)
- For clinical studies, state how sufficient clinical cases will be obtained
- Where animals are client-owned, it should be made clear in the protocol that the owners will be asked to give written consent for the participation of their horse in the study and are fully aware of all procedures their horse (or samples from the horse arising from clinical evaluation) will be undergoing

12. Statement of animal welfare, signature and date

Application forms will only be accepted if they contain the signature of the key contact and are dated.
